Hello, world!

Welcome to the Shouter!

Hello, IPFS

Hello, dorahacks

- At the top is the bulletin board
- The bulletin board is the only one in the whole show
- With GSN, users can submit comments for free

Comment

- At the top is the bulletin board
- The bulletin board is the only one in the whole show
- With GSN, users can submit comments for free
- Gas fees are paid by the promoter of the bulletin board
- Bulletin boards can be requested when and only when the gas from the previous round is depleted

The Shouter

The Shouter
<https://dorahacks.io/>

- At the top is the bulletin board
- The bulletin board is the only one in the whole show
- With GSN, users can submit comments for free
- Gas fees are paid by the promoter of the bulletin board
- Bulletin boards can be requested when and only when the gas from the previous round is depleted
- All bulletin boards are made NFT and the information is stored in IPFS

Why we made this?

- We noticed that the majority of SocialFi projects are creator economy models.
- Most users do not want to bear the gas fee.
- Inspired by Uniswap's liquidity mining model.
- We developed this **promoter economy model** SocialFi project where **promoters provide mobility** and support other users to **use it for free**
